

# Reflection on the 4 principles

## A holistic respect

A holistic respect for the health of woodlands and forests as natural organisms and systems, which have a validity and even sanctity in their own right, regardless of human intervention

A sense of stewardship of forests on behalf of humankind now and in the future, rather than selfish or short-term exploitative use of forests

A sense of communal responsibility for, and pride in, the forests; and of fairness in the provision and allocation of forest-based benefits and resources

A global perspective, based on care for all the world's forests and on awareness of the fragility of global ecosystems and climate.

A sense of stewardship

A sense of communal responsibility

A global perspective

Key but maybe the most difficult to share with people

Identify issues and solutions on ...

**local  
level**

**regional  
level**

**national  
level**

**European  
level**

**Change  
yourself  
and your  
lifestyle**

# further strands for action ...

What is your motivation for participating in this webinar?

30 Antworten

- exchange with other actors
- interest in further networking
- making my/ our project better known
- contributing to a better understanding of what sustainable forestry means
- others

monoculture

cadastre

genetic  
ressources

agroinclusion
