About me

I'm a communicative person, hard physical work is well known to me even though at the moment I have an office job as a municipal employee for EU projects. In my free time I work on my family farm mostly (beekeeping, sheep and some agriculture).

What I expect from host organisation

Since I am from a rural area (island of Cres), I'm quite aware of the possibilities that could be done in promoting in SRD at my local level, I'd like to see implementation of technology and activities in other rural areas so I can help my neighbours and enthusiasts on my island in advancing forward and showing them examples from foreign areas. Eventual time of stay for me would be up to 1 month.
