About me

In my professional setting I ensure facilitation of inclusive process for participatory planning for local economic development leading to improved cooperation and exchange of best practices among local people. I facilitate networking among CSOs and rural association for defining local problems and advocacy activities to lead to effective decision making on the local level.

What I expect from host organisation

I would like to build a network of rural civil society organization based on the knowledge and skills I would gain within the training program. I am intended to allocate donor and local self-government resources for strengthening civil movement for the advocacy of rural needs. Rural Network for Civil Society Organizations will be gathered, and a new platform will be established in Georgia for the first time. As far as Sustainable Rural Development is one of the strategic issues for Georgia and EU supports the action for more than 4 years, an institutionalized mechanism for advocacy is not established yet. Rural Civil Society Network will serve as a national wide union establish solid model for exchanging information from grass roots level to the highest structures of decision making.
