About me

I'm actively involved in rural development sector as a coordinator of Network of Organizations for Rural Development of Kosovo. I have been elected as a member of Executive Board of 'Partnership for Rural Europe - PREPARE aisbl. In this context I'm representing PREPARE in the Steering Group of European Rural Parliament - ERP. I followed a post-graduate study program: Executive Master in EU Studies, program organized by CIFE Berlin, Germany and I had opportunity to attend various international and European programs, which reflected on my experience and career.

What I expect from a host organisation

This program will be a good opportunity for me and for other potential participants interested on the rural development sector. I am interested in all dimensions of Sustainable Rural Development especially on learning about the European dimension and for the trainings to improve my job skills. In this context, I am very interested to share my experience with other participants from various countries and also to learn from them for new ideas and practices applied in perspective countries. The gained knowledge from the program, will be additional strong point for our career especially on rural development sector in the international level.
