About me

In 2010, I graduated in Philosophy and in 2017 I completed my master in Artistic Education. During this process, I was working in pedagogic projects and cultural events where I was implementing activities with children, youngsters and old people that promoted a Creative and Active Citizenship.

From 2013 till 2017, I developed a community and sustainable project in Museum Casal de Monte Redondo (Portugal), where we organized an Eco Cultural Festival Museum Festum with the local community and tried through the event give a new live (Participatory Cultural Programme) to the museum that was abandoned before.

Unfortunately, in my country working for education and culture is a constant struggle for financial security and I had to stop. So in 2018, I decided to leave Portugal and try to find some inspiration in other places. I came to Latgale, a region in Eastern Latvia. Something happened... and Latvian Forest hugged me like home and this deep connection, inspired me to change my lifestyle and start to be more honest with myself and with my aims. I was feeling an inner call to embrace again the simplicity of being alive again! Stop struggling and running and to start to live again the present moment and fight in a positive way for a Sustainable World. I proceed developing educative activities through the Philosophy, Artistic Education and Environmental Pedagogy for children and youngsters, but the year 2019 challenged me to initiate a new journey in my life.

In this moment of my life I realize that I really need to change my lifestyle and start my own project in SRD but first I need to learn. So, I am an educator but I really want to be a farmer too... in future I hope to continue working in education but totally relacionate with out door activities and sustainable pedagogy/ activities.

developing their own projects and work with them to improve my skills and start to transform this dream in reality. And for sure that this program it is an amazing opportunity to begin!

What I expect from host organisation

I hope to get involved and to learn more about sustainable work and projects. I believe that in this moment of my life, it is very important to meet people who are developing their own sustainable projects and work with them to improve my skills and start to transform this dream into reality. And for sure that this opportunity as a trainee, it is the best way to START!
